Or, a Loyal

# ALMANACK

FOR THE

Year of Human Redemption,

1774.

Being the second after Bissextile or Leap-Year.

In which is contained all Things fitting for such a  
WORK; as,

A TABLE of Terms and their Returns;

The Full, Changes, and Quarters of the Moon; the Rising, South-  
ing, and Setting of the Seven Stars, and other Fixed  
Stars of Note; the Moon's Age,

AND

A TIDE TABLE fitted to the same;

The Rising and Setting of the Sun; the Rising, South-  
ing, and Setting of the Moon; Mutual Aspects, Monthly  
Observations, and many other Things, useful and pro-  
fitable.

Unto which are added,

Astrological Observations on the Four Quarters  
of the Year; an HIEROGLYPHIC alluding to these pre-  
sent Times; a remarkable Chronology; the Eclipses, and  
other Matters both curious and profitable.

With a particular Judgment of a visible Lunar Eclipse;  
and many other Things relating to Astrology.

By FRANCIS MOORE, Physician.

LONDON: Printed by J. BETTENHAM, for the  
Company of STATIONERS.

Price Nine Pence stitched.

**A plain and easy TABLE, shewing the Time of HIGH-WATER at all these Places under-named.**

	900	75 0 0	150 0 0	225 0 0	450 0 0	675 0 0	900 0 0
	1000	83 4 0	166 8 0	250 0 0	500 0 0	750 0 0	1000 0 0

If you would know the Interest of one Hundred Pounds for one Month, two Months, three Months, six Months, nine Months, or one Year, look for 100. in the Side; and in the next Column, under one Month, 8s. 4d. for two Months 16s. 8d. for three Months 25s. for six Months 50s. for nine Months 75s. and for a Year 100s. and so of the rest.

This is the honest Way by which Men should  
To Interest let their Silver and their Gold;  
Yet worldly Misers, when to Raking fall,  
They with their Interest get the Devil and all.

THE  
INTRODUCTION.

Addressed to all my Readers on the Uncertainty of  
Worldly Grandeur, and the Fruits of a clear Con-  
science.

**T**HE Babylonian Monarch with ambitious Fist  
First the grand Scepter of the World possess.  
The Persian, Him; the Græcian Him dismiss;  
Him, the awful Roman after dispossess;  
And Him, his own Weight let not long subsist;  
Him, his own Greatness ruin'd with the rest.  
Who then (alas!) this Fall of Monarchs seeing,  
Can hope on Earth for an eternal Being?  
What are the Badges of heroic Blood,  
But Blots to those who have their Birth bely'd?  
What's outward Greatness without inward Good,  
But glorious Painting of a graceless Pride?  
But where with Banners, virtuous Manners bud,  
Where Honours are with Honesty ally'd,  
With Pity, Prowess, Prudence, Right, Humility,  
Faith, Justice, Bounty, there's the true Nobility.  
To shine in Silk and glisten all in Gold;  
To flow in Wealth, and feed on dainty Fare,  
To have thy Houses stately to behold,  
Thy Prince's Favour, and the People's Care.  
The groaning Gout, the Colic, and the Stone,  
Will mar thy Mirth, and turn it all to Moan.  
But be it, that thy Body subject be  
To no such Sicknes, or the like Annoy,  
Yet if thy Conscience be not firm and free,  
Riches are Trash, and Honour's but a Toy,  
This Peace of Conscience is the perfect Joy.  
Wherewith God's Children in the World be blest,  
Wanting the which, as good want all the rest.  
The Want thereof made Adam hide his Head,  
The Want of this made Cain to wail and weep;  
This Want, alas, makes many go to Bed,

When they (God wot) have little Liff to fleep.  
 Strive, O then ftrive to entertain and keep  
 So rich a Jewel and fo rare a Guest,  
 Which being had, a Ruff for all the reft.  
 Rouse, drowfy Genius; Heaven thy Quill infpire!  
 Not one Spark of the Mufes fared Fire  
 Hope thou for, nor yet to gain poetic Power,  
 Since Time's fharp Scithe has lopt thy youthful Flower.  
 And Atropos ftands perdue with her Knife  
 To cut in twain the Twine that holds thy Life;  
 Yet 'tis expected fomething muft be faid,  
 Although it be without the Mufes Aid.  
 What though the envious Grin, with wrinkled Face,  
 And the Malicious treat thee with Degrace;  
 The righteous God his Work is on the Whee',  
 His Enemies (ere long) his Force fhall feel  
 Whilst Homebred Vipers, that malicious Train,  
 Their Poifon fwallow, gnaw their Tongues with Pain.

At Goadby, a pleafant Village near Melton Mowbray in Leicefterfhire,  
 young Gentlemen and others may be conveniently and commendably  
 boarded by THOMAS WRIGHT; and may be taught by him, with the ut-  
 moft Care and Expedition, the Englifh, Latin, and Greek Languages.  
 And alfo the following Parts of the Mathematics, viz. Geometry, Alge-  
 bra, Trigonometry, Navigation, Aftronomy, Dialling, the Ufe of the  
 Globes, and other Mathematical Inftruments. Due Care will be taken of  
 their Morals; and Letters (Poft paid) will be duly answered.

Truly prepared and fold by Mrs. Smith, at Pickworth, in the County of  
 Rutland, the Widow of Mr. Thomas Smith, and firft Coufin to the late  
 ingenious TYCHO WING, Gent. The genuine, and, as far as Art can  
 prefer be, an infallible Medicine for all Sorts of Agues, whether quotidian,  
 or other Day Ague, or tertian; or quartan, or any other.

N. B. This Medicine has been fold by the Family for many Years paff,  
 and has done Numbers of Cures when other Remedies have failed.

Lands furvey'd, divided, and enclosed, and Maps of the fame correctly  
 delineated, and Timber and Polewood furveyed and valued and fold by  
 VINCENT WING, of Pickworth, in the County of Rutland, and  
 THOMAS WRIGHT, of Goadby, in the County of Leicefter, Praeti-  
 tioners in the Mathematics.

# **A TABLE of Terms and Returns for the Year 1774.**

*Hilary Term begins January 11. ends Feb. 11.*

Returns or Eiloun Days.		Exc.	Ret.	Ap.	W. D.
In eight Days of St. Hilary	Jan. 20	21	22	24	Monday
From the Morrow of St. Hilary in 15 Days	27	28	29	31	Monday
On the Mor. of the Purif. of Bl. V. M. Feb.	3	4	5	7	Monday
In eight Days of the Purif. of the Bl. V. M.	9	10	11	12	Saturday

*Easter Term begins April 22. ends May 12.*

From the Day of Easter in 15 Days	April 17	18	19	20	Wednesd.
From the Day of Easter in 3 Weeks	24	25	26	27	Wednesd.
From the Day of Easter in 1 Month	May 1	2	3	4	Wednesd.
From the Day of Easter in 5 Weeks	8	9	10	11	Wednesd.
On the Morrow of the Ascension	13	14	15	16	Monday

*Trinity Term begins June 3. ends June 24.*

On the Morrow of the Holy Trinity	May 30	31	J. 1	3	Friday
In eight Days of the Holy Trinity	June 5	6	7	8	Wednesd.
From the Day of Holy Trin. in 15 Days	12	13	14	15	Wednesd.
From the Day of H. Trin. in 3 Weeks	19	20	21	22	Wednesd.

*Michaelmas Term begins Nov. 7. ends Nov. 27.*

On the Morrow of All Souls	Nov. 3	4	5	7	Monday.
On the Morrow of St. Martin	12	13	14	15	Tuesday.
In eight Days of St. Martin	18	19	20	21	Monday.
From the Day of St. Martin in 15 Days	25	26	27	28	Monday.

**N. B.** No Sittings in Westminster-Hall on Ascension-Day, Midsummer-Day, and the Second Day of February.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

*Common Notes for the Year 1774.*

Golden Number	8	Shrove-Sunday	Feb. 13
Cycle of the Sun	29	Butter-Day	April 3
Dominical Letter	11	Reformation-Sunday	May 6
The Epact	17	Ascension-Day	May 12
Number of Direction	12	Whitsunday	May 22
Sundays after Epiphany	3	Sundays after Trinity	6
Septuagesima Sunday	Jan 10	Advent-Sunday	Nov. 27

# JANUARY hath XXXI Days.

That Man is wise, that can in Peace lie down,  
Scorning the Noise and Nonsense of the Town;  
That can resolve, and being resolv'd, can do,  
Defy base Actions, and their Actors too.  
Let Villains suffer, and let Murd'ers die,  
And Bankrupts cheat like Knaves by Destiny.

# FEBRUARY hath XXVIII Days

The restless Soul, uneasy, seeks Relief;  
 His Lust deceives him, Passion plays the Thief:  
 Both steal his Time, and both preface his Fall.  
 Bad Man, worse Heart, but Conscience worst of all.  
 Thus the supposed Wise for a pery Self,  
 By grave Advice prudently damns himself.

28	4 45	7 13	1 31	<b>Full Moon 26 Day at 10 Fore.</b>
29	4 43	7 14	2 31	severity of Divine Justice.
30	4 41	7 15	3 35	Therefore when Fate's unkind, dear
				Friends be wise;
				And bears its Ills without the least
				Sorrow.

# M A Y hath XXXI Days

Where Cares exceed, there's an uneasy Bed;  
 The thoughtful Mind makes a projecting Head.  
 He's well supply'd, where Nature's bounteous Store,  
 Gives him enough, he need request no more.  
 But if more, thank God there is, then use it well,  
 Riches ill used is the Highway to Hell.

# JUNE hath XXX Days.

Some arm'd with Hope, others on Fame rely,  
 Wade thorough Dangers of the deepest dye;  
 These, like the Bee, think Toil their Happiness,  
 Not knowing who shall their hard Pains possess:  
 Or, like indulgent Parents, clad with Cares,  
 Spin out themselves, providing for their Heirs.

# JULY hath XXXI Days.

Passion and Lust, Nature's two handmaid Sins,  
 Two mystic Devils, two domestic Twins;  
 Both born at once, equal in Quality.  
 Of different Natures, yet they both agree  
 To govern Man, and his luxurious Heart,  
 With him the World too, either by Force or Art.

# AUGUST hath XXXI Days.

The general Influx of the Orbs above,  
By their due Motions in their Orders move;  
To sway and order all sublunar Fate,  
To raise some great, others debilitate.  
Thus Nature, by her Laws, first gives us Breath,  
And by these Edicts too, appoints our Death.

# SEPTEMBER hath XXX Days.

Old Chronos walking in the Virgin's Land,  
Met the boid Horseman with his Dart in's Hand.  
Two rough call Fellows (that their greeting shows)  
First give ill Words, and then they fall to Blows:  
Their Conflict's sharp, and both their Valour try'd,  
But Mavors smote him; so he fell, and dy'd.

# OCTOBER hath XXXI Days.

Among the Frowns of a disturbed Age,  
 Disorder'd Man's the Wonder of the Stage;  
 Like an imprison'd Bird hops up and down,  
 From Perch to Perch, makes his Life troublesome.  
 So Honour, Pelf, and Lust delude the Eye,  
 And 'tis that Light most Souls are guided by.

# NOVEMBER hath XXX Days.

Of philosophic Terms I have heard some say,  
 The *a quo* and *ad quem* bear a mighty say.  
 By this I apprehend here and above,  
 All Things have Motion, and they all must move.  
 Blest be that Hand, whose Words all things obey,  
 If this be true, our Ills will move away.

29	8 0	4 1	8 22	Thanks be to God, we of the English Nation
30	8 1	3 55	9 11	enjoy both Peace and Plenty. Vivat Rex.

# DECEMBER hath XXXI Days.

'Tis Time's swift Foot that measures out our Years,  
Our Days and Hours, with our Plagues and Fears.  
By Time our Fathers to their Periods came,  
So to our Heirs he measures out the same.  
Howe'er you use him, still he keeps his Way,  
And should you ask him, he'll refuse to stay.

A Table of some principal fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Co- lour	Alt.	Magn.	Names of the Stars.	Rise h. m.	South h. m.	Sets h. m.
♂	53	1	Aldebaran, or Bull's Eye	1 a 34	o a 48	ob o
♂	21	1	Left Foot of Orion	4 31	1 31	1 34
♂	36	2	Middle * in Orions Belt	4 13	1 51	o 35
♂	45	1	Right Shoulder of Orion	3 23	2 8	o 8
♂	21	1	Syrius, the great Dog	6 41	3 1	o 48
♂	43	2	Procyon, the little Dog	5 33	3 53	2 a 7
♂	30	1	Heart of Hydra	8 39	5 41	2 44
♂	51	1	Regulus, Lion's Heart	7 26	6 21	5 16
♂	54	1	The Lion's Tail, Denab	8 42	7 54	7 7
♂	28	1	Virgins Spike	12 46	9 38	6 36
♂	58	1	Arcturus	10 47	10 30	10 12
♂	12	1	Antares, the Scorp. He.	17 36	12 39	7 42
♂	46	2	Bright * of the Vulture	17 38	16 3	9 b 27
♂	6	1	Fomelhaut	11 14	19 11	10 37
♂	56	2	Head of Andromeda	10 42	10 19	2 56

THE brightest of the 7 \*'s is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the  $\delta$  and  $\gamma$ .

The fixed Stars all rise, south, and set about 4 Minutes sooner every Night than they did the Night before; this considered, the exact Time of their Rising, Southing, and Setting for any intermediate Night, not herein noted, may be very easily deduced from these Tables, by Inspection only.

To know the Time of the Rising, Southing, and Setting of any Star in this Table, for any Day required, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the 7 Stars on that Day, and you will have your Desire; observing that in this Table, *a* stands for *after*, and *b* for *before*.

A Table shewing the Bearing, Distance, Longest Day, and Difference of Meridians of most of the principal Cities in the World, from the famous City of L O N D O N.

Of the ECLIPSES of the Two Great Luminaries  
in 1774.

**T**HIS Year affords two Eclipses of the Sun, both of them nearly central; the one before his Apogee, and the other after it: Consequently we cannot expect the Moon to be eclipsed at all until the Year following. This Account of the Eclipses, with the Time of their happening, and some other Remarks following, are as they were transmitted to me by my astronomical Friend, Mr. H. ANDREWS, Teacher of the Mathematics at *Royston*, in the County of *Hertford*, with whom Youth may be commendably boarded at very reasonable Rates.

The first of these solar Eclipses happeneth upon *Saturday* the 12th of *March*, near our ten in the Forenoon, but it will be invisible to us in *England*, if the Sun shine ever so clear, by Reason of the Moon's Parallax, tho' she has North Latitude; yet it is so small, that her Parallax will depress her too low for us *Europeans* to have a Sight of it, but in more southern Situations it will be a very great Eclipse; for in  $1\frac{1}{4}$  Degree of South Latitude, and in  $30\frac{3}{4}$  Degrees East Longitude from *London*, the Sun will be central and annular eclipsed on the Meridian, viz. at their Noon day. The second and last of these Eclipses, which is also invisible to these Parts of the Globe, happens upon *Tuesday* the 6th of *September*, about our Two in the Morning. In Latitude of 9 Degrees North, and  $150\frac{1}{2}$  Degrees East from *London*, the Sun will annular and centrally be eclipsed on the Meridian, at 58' past our One o'Clock in the Morning; and along the Track of central Appearance, which happens among the *Phillipine Islands* in the *Pacific Ocean*, in *Asia*, and Parts adjacent, instead of an astonishing gloomy Darknes, the Spectators will be entertained with a splendid Ring of Light encompassing the Moon's dark Body on every Side.

Other celestial Appearances in this Year 1774.

**H**E, (that is the above H. ANDREWS, of *Royston*) adds also, that the Nodes of the Moon are so posited as to make her, in these Northern Latitudes, obscure from its Beholders, that notable Star called *Aldebaran* (it is a fiery red Star, near the Seven Stars) vulgarly called the *Bull's South Eye*, at every Appulse to that Star: Of these Appulses three will be visible to us, if the Air prove serene and favourable.

The first of these Occultations happens on *Saturday* the 22d of *January*, at 17 Minutes past Four in the Evening, the Star will just touch the eastern Limb of the Moon, and at 31 Minutes past Five will again appear on the contrary Side, after having been hid one Hour and 14 Minutes. The second happens on *Thursday* the 14th of *April*, in the Evening, the Star will touch the Moon at 10 Minutes past Six, and will again appear on the contrary Side at 19 Minutes past Seven, after being hid one Hour nine Minutes. The third happens on *Friday* the 18th of *November*, in the Evening, the Star touches the Moon at 51 Min. past Five, and will appear again on the other Side at 48 Minutes past Six, after having been hid 57 Min. On *Sunday* the 8th of *May*, there happens a notable and beautiful Occultation of the Planet *Mercury* by the Moon: This Conjunction is worth the Notice of the Curious, for though it is in the Day Time, it may be discovered by a tolerable good Telescope of no more than four or five Feet in Length, if the Air be clear. The Immersion will be 38 Minutes past Seven in the Morning, and the Emerision 13 Minutes past Eight; so that *Mercury* will be covered by the Moon 35 Min. and this Planet being near his greatest Elongation from the Sun, makes it an Occultation worthy the Observation of the curious Astronomers.

*N.B.* The above Computations were made from the late Professor *Mayer's* manuscript Tables of the Stars Longitudes, &c. from the late Dr. *Bradley's* Observations.

A Continuation of the Effects of COMETS, which I promised in my last.

THE next that I shall take Notice of, is that of 1456; but Mr. *Edward Sherburne* says there were two at the same Time, and that they began in *June*, the one in *Cancer*, the other in *Leo*, and their Tails were above 60 Degrees in Length; there followed great Ruin, and Destruction to Mankind, Wars, Pestilences, and Earthquakes, bloody Wars between the *Turks* and *Christians*; and that great Man *John Huniades*, the Terror to the *Turks*, died much lamented by all *Europe*. Also there was a direful Earthquake in *Italy*, by Means whereof 30,000 Persons lost their Lives, and the young King of *Hungaria*, on the Day appointed for his Marriage, died suddenly. One of *Huniades's* Sons, being then a Prisoner and expecting Sentence of Death, was set at Liberty, and chosen King; so that

there was a sudden and stupendous Alteration of Affairs : *Scanderberg's Wars*, and the great Commotions caused thereby, were about this Time. In the Year 1460 a notable Comet was seen, as *Prætorius Rockenbaechius*, and *Funccius* relate, the King of France and the King of Scotland died. *Cracovia* was laid waste with Fire and Sword. In England, the Duke of York, aspiring to the Throne, headed an Army, designing to depose the King, but was himself slain. His Son, the Earl of March, put in for the Crown, between whom, and King Henry VI. there was, this Year, the bloodiest Battle fought that ever was known in England. No less than 37,000 Englishmen were slain in one Day. The Earl gets the Crown, and the King was kept Prisoner in the Tower. A civil War began in France.

In the Year 1470, a marvellous Comet appeared. That great Mathematician *Regiomontanus*, (whom *Peter Ramus* calls the Glory of Germany) was accurate in observing that Prodigy in all its Motions, from whom *Mizaldus* hath given an exact Description of it. The Body of the Star did at first seem small, but on a sudden it grew to a wonderful Magnitude, and then again decreased: Sometimes of a white, other while of a Flame-like Aspect. The Blaze was at the first Appearance, and a little before it disappeared, short; but after it had been seen above 40 Days, the Length of it was above 50 Degrees; its Duration was the Space of 80 Days. At first it could be seen only in the Morning, at last only in the Evening; in the Middle of its Duration it might be seen all the Night long: Its Motion, (which was always retrograde) at its Beginning and Ending, was slow, but in the Midst of its Circuit was swift, even so as to dispatch 60 Degrees in one natural Day; it passed from *Virgo* thro' *Bootes*, the *Dragon*, *Ursa Minor*, the *Feet of Cepheus*, *Breast of Cassiopeia*, *Andromeda*, *Pisces*, *Serpentarius*, until it came to the *Whale*, where, by Reason of *Occafus Heliacus*, it disappeared. The Blaze did continually point at the *Gemini*: In the same Night, presently after Sun-set, it would point to the East, near Midnight to the South, after Midnight to the West, a little before Sunrise to the North. As for the Events; there followed a very great Drought, of three Years Continuance; so that in *Hungary* the great River *Danau*, which is the greatest River in Europe, might be waded over; such horrible Winds

in

in *Germany* as blew down many Houses ; a terrible Plague in which many deserted from their Relations, that so they might escape with their own Lives. The cruel Wars of the Duke of *Burgundy*, which continued until his Death ; also Wars between the *Hungarians* and *Polanders* ; and in the East between the *Persians* and the *Turks* ; this Year the K. of *England*, *Henry VI.* was murdered by the bloody Hands of the Duke of *Gloucester*.

Anno 1477, a cærulean dark coloured Comet was seen, as *Eckstormius* and *Alstedius* relate : And *Mixaldus* says, the Emp. *Charles V.* used to say, that blazing Star was portenteous of his Grandfather's Death, who fell among others that were slain in the Battle fought before *Nantz* that Year : It was a fatal Year to many other Princes. A direful Plague followed ; and such Heat and Drought, that great Rivers were dried up, and not only Fruit-trees were destroyed, but whole Forests were set on Fire by the scorching Heat of the Sun.

Anno 1491, a Comet appeared in the Evening, a little after Sun-set ; the Star small, but the Stream long, extending itself Eastward in direct Opposition to the Body of the Sun : Immediately after which the *Turks* overcame *Dalmatia* and *Sclavonia*. There was also a great Mortality both amongst Men and Cattle. The Pope and the King of *Poland* died that Year. The King of *Portugal* was killed by a Fall from his Horse. The next Year the new World, (as it used to be called) viz. that Part of the World which now bears the Name of *America*, was discovered by *Christopher Columbus*.

These are the Accounts of some of the Catalogue of Comets I have by me, and from hence I say it has been owned, either vocally or tacitly, by all that have wrote of Comets, and their Natures, that they are always followed and attended with remarkable Circumstances in the World, as Scarcity, Wars, Pestilences, Earthquakes, Inundations, &c. with Variety of other Mischiefs which are prejudicial to Mankind ; and these we may reasonably judge to be produced by their malignant Influence. Besides, if these Comets were made, (as in all Probability they were) at the same Time God made the rest of the cœlestial Family, it is most certain they were intended for something more, than to amuse Mankind with a bare Speculation of them once in five or six hundred Years, more or less. I would have been more copious in this Discourse, if I had not thought

thought I had said more already than will be kindly received; but be it as it will, I hope it may be a Means to excite some abler Pen to enquire into the Truth of this Doctrine, and so communicate their Thoughts of it to the next Age, which may perhaps improve the astrological Part, as they have the mathematical: And so I descend to some other Particulars. You may remember I told you last Year, that a Gentleman, some Years since, presented me with a large Volume of Hieroglyphics; I printed one of them in my last Year's Work, and shall yearly do so while I am able to write; That for this Year is the following:

Having said thus much, give me Leave to tell you one of *Nostradamus's* Prophecies, which is fulfilling near these Times, you may find it in his sixth Century, and 240th Page; it runs thus:

*Par les Physiques le Grand Roy delasse  
Part fort bou Art de l'Ebrieu est en vie  
Leu & son Genre an Regne hault pouse  
Grace donnee a Gent qui Chriest envie.*

In English.

*The great King, being forsaken by Physicians,  
Shall be kept alive by Magic, and not by the Art of a Jew.  
He and his Kindred shall be set at the Top of the Kingdom,  
Grace shall be given to a Nation that envieth Christ.*

#### EXPLANATION.

This, in plain Words, signifieth no more, but that a King shall be desparately sick and forsaken by his Physicians, and shall recover by the Help of a Jew, for which Fact these of that Nation shall be re-established in his Country.

Of the WINTER Quarter.

WHICH takes its Beginning at such Time as the glorious Lamp of Heaven, the Sun, touches the First Scruple of *Capricorn*; which happens on the 21st Day of *December*, at 57 Minutes before Noon, 1773 at that Time 28 Degrees of *Aquarius* ascends on the East, and 17 Degrees of *Sagittarius* on the Medium of *Cæli*; with *Saturn* in the 7th House hath just passed the Square of the Sun, Lord of the 7th, and is in Square to *Mercury*, in the Medium *Cæli*. The Moon, that represents the common Sort of People, is applying to the Square of *Mars*, and, at the preventional New Moon, was in Square to *Saturn*; and, at the postventional Full Moon, is in Opposition to *Mars*: This shews miserable Complaints among the Poor in general, both for Want of Money and Want of Trade. The Moon in *Aries* represents the Head, and *Cancer* on the 6th, the Breast, Stomach, and Chest, shew the People, during this Quarter, will be subject to Vertigoes, Apoplexies, and Dead Palsies, with Distempers of the Lungs, such as Coughs, Asthmas, Shortness of Breath, Spitting of Blood, and such like, and many of these Disorders are like to prove mortal, especially when they fall upon Women in Child-

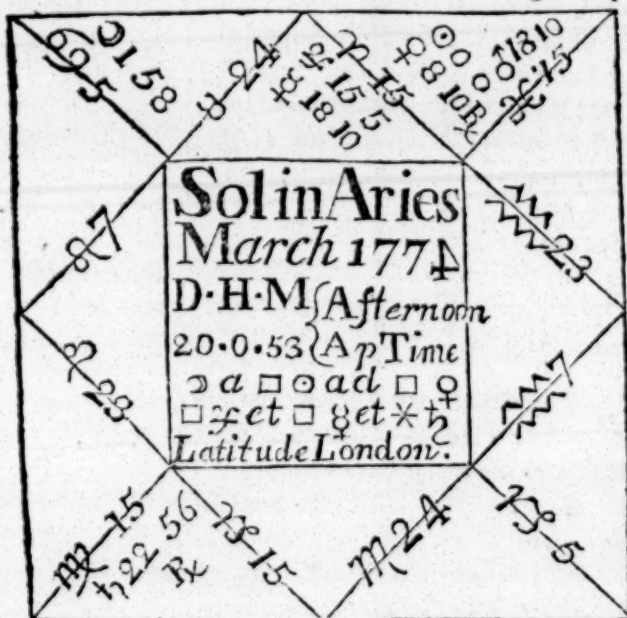

Child-bearing and Child-bed. But what I shall more particularly observe in this Quarter is, that in *February* last 1773, was an Opposition of the two superior Planets *Saturn* and *Jupiter*; which, as I observed, generally stir up Sedition, Tumults, and Discontents in the Minds of Men, Animosities and Quarrels between different Parties, under one and the same Government; according to the Saying of *Origanus*, in eo Anno nulla quies cum *Saturnus* & *Jupiter* in Oppositione sunt, nunquam enim Mentis Hominum quiescunt; and of *Haly*, significat Lites & Contentiones inter Homines, &c. And in my Almanacks for 1771, and 1772, I also observed, that this Aspect of the Superiors does often produce malignant, pestilential, and contagious Distempers; sometimes great Inundations of Waters, and in other Parts, and at other Times, extreme droughty Seasons: How far these Predictions have been verified, I leave to the Judgment of every impartial and observing Man.

It is observable, that the Superiors have not been far distanced from this Aspect for several Years past, in which what unaccountable Things have been transacted, what intestine Feuds and Divisions have attended this divided and almost distracted Nation, would fill a Volume to recount. There is one Thing more I have to observe; I wish that the Grandees in the *European* World had a better Understanding among themselves, which might prevent Differences in some other Parts, and still continue Peace and Plenty to *Great-Britain*: And so I conclude with these poetical Lines;

*To all my Countrymen who are at Ease,  
And reap the Effects of the now glorious Peace;  
May it be lasting, honourable too,  
To all that wish it, without more ado:  
And may it be extended farther, where  
Its really wanted, as 't doth now appear.  
Let all sophisticating Heads take Care  
They do not bring themselves into a Snare;  
Things would be far much better understood,  
To study and promote each other's Good.  
And would all Persons truly loyal be,  
Live from loose Faction, and ill Customs free,  
The Benefit to all we soon should find,  
And the World more easy prove to all Mankind.*

## OF the SPRING Quarter.

**T**HIS Quarter commences at such Time as bright *Phæbus* mounts the first Scruple of the equinoctial Sign *Aries*, of the Earth, *Libra*, which happens this Year on the 20th Day of *March*, at 53 Min. past Noon, at which Time seven Degrees of  $\Omega$  ascends the Horizon, and 15 Degrees of *Aries* on the Midium *Cæli*, at which Time the Heavens are posited as in the following Scheme, and the most material Aspects are, an Opposition of  $\odot$  and  $\text{♄}$  from *Virgo* and *Pisces*,  $\text{♂}$   $\text{♀}$   $\text{♁}$  in the latter End of  $\text{♊}$  and 8 of the two Infortunes from  $\text{♁}$  and  $\text{♋}$ . Now if we follow the Rules of the antient Astrologers, the astronomical Rulers of this Quarter are *Jupiter* and *Sol*, and *Venus* and *Mars*, if so, and if we consider them according to their present Position, we have great Reason to believe, that the Summer half Year will prove delightful, fruitful, and peaceful to all those Places that those Signs represent,

that these Planets are posited in, as *England*, *France*, Part of the *Low Countries*, *Moscowia*, *Swædland*, &c. These, and the rest, seem to import no other as to us of *Great Britain*, but that our Governors and People shall be wholly at Ease, viz. our Illustrious and Gracious King *GEORGE*, Lords, Commons, Clergy and People; the Northern Crowns made peaceful and easy; though I expect the Op-  
position

position of the Infortunes commonly gives some Discontent and grumbling among the common People of this Kingdom, as well as elsewhere. Nay, there are some above these are still disgusted and out of Order, not so much in State, as Church Affairs; but considering the Conjunction of the *Sun* and *Venus* in our own Horoscope, plainly foretel the Differences of this Nature are but of a short standing. Thus we see the Actions of the Beginning, or of the first half of the Year, according to the Production of natural Causes, are likely to be favourable and of an encouraging Nature, and promises Plenty of all earthly Blessings still to continue amongst us. These are the Things that seem to be the natural Signification of the heavenly Bodies at this Time; then most unquestionably it is incumbent upon all of us, to return unto the Lord our God, continual Sacrifices of Prayer and Thanksgiving for all his Mercies and loving Kindnesses: This would, doubtless, be a great Means to remove our Evils, and continue those rich Blessings we now enjoy.

*See what a glorious and successful Spring,  
Which doth by Peace and Plenty Profit bring,  
Though the Minds of Men so various seem to be,  
They cant expect these Things with Certainty;  
But such whose Principles are just and right,  
Are sure to enjoy these Blessings Day and Night.*

DECLINA A MALO, ET IN BONO TE EXERCE.

Of the SUMMER Quarter.

**T**HE Summer Quarter is always said to begin, when this our earthly Globe inclining Southward 23 Degrees 29 Min. towards the Sun, will volve and remove us her Northern Inhabitants to the greatest Portion of Day; or when the Sun (according to Appearance) enters the first Scruple of ♊, which, either Way taken, falleth this Year on Monday, June the 21st, at 50 Min. before Noon, at which Time 19 Deg. of Gemini are on the Mid-heaven, and 22 Deg. ♈ ascend the eastern Horizon. The mutual Aspects are chiefly these, ♈ ♀, ♈ ♀, \* ♈ ♀, and these are no Way contradictory to the Spring Quarter, but seem to confirm and establish all the Happiness there promised; and Persons of Worth and Honour, both in Church and State, meet with suitable Preferments in due Time; our Merchants and Tradesmen coming into a more thriving Condition, as well as our Farmers and Graziers.

*Now*

*Now what obstructs our Happiness on Earth,  
Or should retard or hinder civil Mirth?  
Give God the Praise, for that I here intend,  
And each one study how their Lives to mend:  
Then with all Chearfulness their Days well spent,  
Such Mirth as this none ever need repent.*

# SEDITIONS REI PUBLICÆ RUINA.

Of the AUTUMNAL Quarter.

**W**HICH begins at such Time as the Sun enters the Equinoctial Sign  $\text{♈}$ , or more really when the Earth enters  $\text{♈}$ , hath volved herself at right Angles to the Sun, and receives a like Portion of Light and Darkness; which, either Way taken, happens this Year on *Friday* the 22d of *September*, 38 Min. past Midnight, at which Time nine Deg. of  $\text{♈}$  is on the Medium *Cæli*, and three Degrees of  $\text{♈}$  ascends the East Angle. The Aspects near the Ingress are  $\Delta \odot \text{♈}$ ,  $\odot \odot \text{♈}$ ,  $\ast \odot \text{♈}$ ,  $\ast \text{♈} \odot$ ,  $\odot \text{♈} \odot$ , and  $\odot \odot \text{♈}$ , they are some of friendly Nature, and others are not so: But as my Book is at an End, I must leave to Time to discover the Events.

*Why list we not our Minds above this Dust,  
Have we not perceived that God is just.*

FINIS.

BOOKS Lately Printed for JOHN BEECROFT,  
at No. 23, in Pater-Noster-Row.

Recommended by the Society for Promoting Christian Knowledge.

## The Whole Duty of Man.

Laid down in a plain and familiar Way for the Use of all, but especially the meanest Reader; divided into 17 Chapters; necessary for all Families: With private Devotions on several Occasions. The above Book is printed on a large Letter, 8vo. and sold at 4s. 6d.

Ditto in large Twelves at 3s. in Calf, and 2s. 6d. plain.  
Ditto on small Twelves on a neat Letter, Price only 1s. 6d.

*Allowance made to those who buy a Quantity to give away.*

Where may be had

The CHRISTIAN MONITOR; or, An earnest Exhortation to an Holy Life: With Prayers and Meditations.

A COMPANION to the ALTAR; Shewing the Nature and Necessity of a Sacramental Preparation in Order to our worthy Receiving the Holy Communion.

This Book is printed of all Sizes to bind up with the different Sorts of Common-Prayers, and is printed *only* for JOHN BEECROFT, at No. 23, Pater-Noster-Row.
